

20 ft = 660
40 ft = 1360
40 HQ = 1640

W x D x H =
25.3 x 21.4 x 62 cm

Gross weight
6 kg

Product data sheet

Product category	Air purifier
Brand	Qlima
Model	A 68
Colour	White
EAN code	8713508778617

Technical specifications

Included filters	Pre filter / Active carbon / HEPA	
HEPA Class	E11	
Power consumption	W	50
Power supply	V/Hz/Ph	220 - 240~ / 50/60 / 1
Current (nom.)	A	0,36
Airflow (low/mid/high)	m ³ /h	91 / 166 / 225
Suitable for space	m ³	68
Sound pressure noise level at 1 m (SPL)	dB(A)	42.5
Negative ions generated	ions/cm ³	8,10 ⁶
Control	electronic	
Fan speeds	3	
UV-C disinfection	Yes	
Dimensions (w x d x h)	mm	215 x 176 x 585
Net. weight	kg	4.5
Protection class	IPX0	
Warranty	year	2

All data is measured in accordance with applicable EU specified standards at the time of production. To be used for indicative purposes only.

UV Light: The built-in UV lamp provides light which is effective against small particles like bacteria, viruses, germs and fungal spores and sanitizes the air.

Air purification: The air purifier is equipped with a 2 layer. The **HEPA** (High Efficiency Particulate Air) filter, captures allergens like bacteria, dust and pollen from the circulated air with an efficiency up to 99%. The washable **pre filter** captures large dust particles.

Air Quality analysis system: The quality of the air is tested and displayed by the colour on the front panel (red = poor / orange = average / blue = good). In auto mode the device automatically adjusts the fan speed in order to improve the indoor air quality.

Ionizer: Automatic production of negative ions for an increased comfort of use.

General: Many homes are sealed tightly to prevent outdoor temperature interference, and thus lack proper ventilation systems. Without sources of ventilation, you are breathing in harmful particles. Indoor air pollution is a serious cause of allergies, asthma and other ailments. The air we breathe affects our health in many ways. Just as good air can vitalize and restore our health, bad air can adversely affect our well-being on a daily base. Natural air contains negative and positive ions, in a good balance. Indoor climates suffer, for several reasons, often from a lack of negative ions. A lack of negative ions can influence well being cause e.g. dizziness, headaches, stress, etc.

Filter cleavage: The pre filter can be cleaned with a vacuum cleaner and/or lukewarm water. The HEPA filter needs to be replaced every (half) year, depending on room conditions.

Low noise mode: In this special mode the noise output is significantly reduced by lowering the units capacity.

Timer: Timer can be set with an operating time of 2, 4, 6 or 8 hours. The unit switches OFF automatically afterwards.

Electronic controls: The unit is equipped with electronic touch controls.

4 fan speed settings: low, normal, high and auto. A LED indicator will show the selected speed.

Auto-stop: The unit stops automatically when the front cover is removed.

Childproof lock: In this mode the operation of buttons is blocked, except the on/off button.

Design: The air purifier is part of a modern range of Qlima products.

Full colour box: The unit is delivered with its accessories in a full coloured box showing the main specs and features in several languages.
