**CO<sub>2</sub> sensor:** The user is informed when additional ventilation is required. The heater will be switched off when the room is not ventilated sufficiently.

**High-tech burner:** This heater is equipped with a burner system that heats up extremely quick and very gradual. This gives a more comfortable heating sensation.

**Fuzzy logic:** This heater is equipped with a self-regulating temperature control system. The heating mode can be set according to the requirements.

**Semi-automatic operation:** This heater is equipped with a 24-hour programmable timer and integrated thermostatic control to maintain the desired room temperature.

**Wickless design:** Provides clean and economical heating without wick maintenance or replacement.

**Information display:** The digital displays helps to keep track of all the important heater functions.

**Safety system:** This heater is fitted with a safety system that automatically switches off the heater after approximately 56 hours of continuous operation.

**Smart Save mode:** The 'SAVE' function allows you to keep the set temperature in the room. This saves on the energy consumption.

**Childproof lock:** When this button is pressed, the operation of buttons will be blocked, except the on/off button.

**Easy touch cap:** A new way to easily mount the removable fuel tank cap without touching the tank directly.

**Automatic airflow control:** The speed of the built-in fan is self-regulatory, depending on the burning mode of the heater.

**Automatic extension operation mode:** When the fuel tank is almost empty, the display will show that the tank has to be refilled. The extension operation mode is activated and the heater switches to the lowest burning mode for more than one hour.

**Large autonomy:** The large 9 l fuel tank is good for up to ||MaxAutonomy|| hours of pleasant heat.

**Additional heat output:** All consumed electric energy is emitted in the room to be heated.

**Anti-odour system:** The perfectly balanced heating system burns almost 100% of all fumes and gasses throughout the complete combustion process (start up - heating - cooling down). The result is a comfortable heating experience without unpleasant odours.

**Quiet operation:** When heating the room, the device produces only a limited amount of sound. Also in the start up phase, the heater produces very little sound.

**Made in Japan:** This heater has been produced according to the ISO 9000:2015 Quality Control Standard.
