---

**Wi-Fi:** Powered by Tuya: Smart air conditioning, remotely controlled with Wi-Fi via Tuya App.

---

**Remote control:** This unit can be operated with an easy to handle remote control.

---

**Dehumidification:** The unit can also be used as a dehumidifier only. In that case the exhaust hose is not connected and warm air returns in the room.

---

**Cooldown effect:** The unit removes humidity by condensation. The condensate cools the condenser and is removed by the hot air discharge. This will increase the energy efficiency, the so called "cool down" effect.
