## SC 6053

## Split unit air conditioner pre-filled

#### **Product data sheet**

Product category	Split unit air conditioner pre-filled
Brand	Qlima
Model	SC 6053
Colour	White
EAN code	8713508789316
EAN indoor unit	8713508788609
EAN outdoor unit	8713508788968

Energy efficiency class average season A++ A  PdesignC / PdesignH kW 5,3 4  Capacities cooling / heating (min./nom./max.) kW 3,39 / 5,28 / 5,59 3,10 / 5,  Power consumption (nom.) kW 1,6 1,  Indicative annual energy consumption during season (Qce / Qhe) V/Hz/Ph 265 14  Current (max.) ### SC 6053

Quick Connector System

Outdoor unit frost protection -25°C

WiFi functionality

Powered by Tuya

Cooling, heating & dehumidifying

Inverter techology

Eco-friendly refrigerant R32

2 Layer filter

Remote control with display included

Timer function

## Split unit air conditioner pre-filled

Easy installation via "Screw Quick Connector System: The connection between indoor and outdoor unit is easy. From an environmental point of view it is required that final connection is done by a certified engineer.

Wireless smart control: The air conditioner is equipped with Wi-FI for extra comfort and to save energy. With the smart Tuya app you can start, stop or operate the main functions of the air conditioner remotely.

**Cooling + dehumidifying + heating (heat pump):** The air conditioning is a complete year-round air treatment system. It heats and cools in an efficient way and can also be used as a dehumidifier.

Air conditioning: In COOLING mode the unit produces a refreshing cool airflow.

**Heating:** In HEATING mode the unit produces a warm air flow. The unit absorbs heat from the outdoor air to warm the air inside, a very efficient technique.

**Dehumidifying:** In DRY mode the unit extract excessive moist from the room. Note: In COOLING mode the

**Inverter technology:** The DC Inverter air conditioner uses its maximum power to get to the set temperature when the appliance is turned on. Once the tempeature is reached, the unit continuously adjusts the compressor speed to maintain the set temperature.

**Minimum energy consumption:** The compressor works at minimum capacity once the set temperature is reached. As a result, the over all power consumption is reduced significantly (up to 35% less than non inverter/ conventional types)

**Frost protection in outdoor unit:** A PTC heating cable will clear the drip pan in the outdoor unit of ice, ensuring that the condensate water can reach the drain point. The compressor crankcase is provided with a heating cable as well. Therefore, the unit will perform under extreme weather conditions (up to -25°C).

**Home Freezing prevention:** By activating the freezing prevention mode (in heating mode only) the unit overrules the indoor temperature setting and set it to approx 8-10°C. In this mode the unit operates at the lowest possible energy consumption.

**Environment friendly refrigerant R32:** The most preferred and environmental friendly refrigerant R32 is used in the air conditioner

**Automatic low sound mode:** This high-tech air conditioner will operate on a whispering quiet level (20,5 dB) as soon as the room temperature has reached the set temperature.

Remote control with LCD screen: The air conditioner can be operated by the remote control up to a distance of approx. 8 metres.

Remote control holder: The unit is delivered with a convenient holder that can be mounted on a wall.

Adjustable airflow: The up-down airflow can be automatically changed by using the SWING mode. The left-right airflow can be changed manually.

Sleep Mode: The air conditioner increases (cooling) or decreases (heating) automatically the set temperature with 1°C per hour (first two hours) and then maintain the temperature (next five hours). After 7 hours, the unit will stop automatically. In this mode the unit works silently and saves energy at the same time.

Fan speed setting: The airconditioner has multiple speed setting. The LCD display on the remote control will show the chosen speed.

**Automatic operation:** In auto mode the unit selects the most suitable operating mode, by monitoring he indoor temperature: Cooling, Dehumidifying or Heating.

**2-layer air filter:**The air conditioner is equipped with a 2 layer filter. The HAF air filter captures allergens like bacteria, dust and pollen from the circulated air with an efficiency up to 80%. The cold catalyst filter decomposes a variety of harmful gases.

**Auto restart function:** In case of a power failure during operation, the latest operation status is memorised and the unit starts operating automatically after power recovery.

Timer: Timer function can be set between 30 minutes and 24 hours (Timer On or Timer Off)

**Full colour box:** The unit is delivered completely with auxiliary parts in a full coloured box showing applications and operation information in several languages.
